

Welcome to a new era in comfort & protection!

Warranty

Your Cool Cap Heat Blocking Car Cover® comes with a 90-day money back guarantee. If you are not satisfied with your Cool Cap® send it back, in good condition, for a full refund, minus any shipping and handling fees.

Safety Warnings

Your Cool Cap® is a non-breathable, heat blocking, car cover. It is not meant as a plaything or for any other use but to cover the passenger compartment of your car and keep it cool. Keep your Cool Cap® out of reach of children, as suffocation could occur if a child were to become trapped underneath it.

Always make sure the area is clear before throwing on your Cool Cap®, as the cover, or your Soft Hooks, could cause injury to anyone standing nearby. Never over tighten your Soft Hooks, as a bungee with too much tension on it could release unexpectedly, resulting in injury to yourself or someone nearby. Never use a Soft Hook without an end cap.

Do not use your Cool Cap® in windy conditions. Always completely remove the Cool Cap® from the exterior of your car before operating your vehicle.

Setting Up Your Cool Cap® The First Time

First, lay the Cool Cap® on your vehicle so that it is positioned evenly from side to side and then strap your mirrors with equal tension. (Some users will not utilize the mirror straps - instead they will Soft Hook to their front wheels, utilizing the webbing loops in front of each Velcro strap.) Next, tie a Soft Hook to a webbing loop above each rear wheel. Bend the Soft Hooks in your hands to create a hook and then hook to your rear wheels, or rims, so that they are equal length and tension. Over-tightening will tear your cover.

Tips To Put On Your Cool Cap® (See videos on our website @ itsCOOLinHERE.com)

- Throw it on, or simply pull it on. Do it 3 times and you'll be a pro!
- Stand on the windward side of your car so the wind will help unfurl your Cool Cap® over the car.
- With your back to the car, hold the back end of the Cool Cap® in your front hand (front of car) and the front end of the Cool Cap® in your back hand (back of car).
- Twist & throw the Cool Cap® over the roof as if you were throwing a Frisbee, but use both hands.
- Pull it to cover your front windshield (some people like to tuck it under their wipers).
- To lock on your sedan, pull the tail of the Cool Cap® into your trunk and shut the lid on it.
- For extra coverage, and if rain is likely, leave it out of your trunk and add a soft hook at the center rear.

Removing Your Cool Cap®

- Tuck the Soft Hooks into their webbing loops on the edge of the Cool Cap®. This keeps them from getting tangled and from accidentally hitting people as you throw your Cool Cap® over your car.
- Release the Cool Cap® from your mirrors, open your trunk, and pull your Cool Cap® off the car.
- Gather it loosely into your arms as you pull, and stow it in your trunk or rear cargo area.
- Cool Caps® are not designed to be stored in our Reflectionite® tote bags.

Basic Care

To clean your Cool Cap® use warm soapy water and a sponge or towel. If the underside of your Cool Cap® becomes wet, air-dry it by flipping it over and drying it in the sun. 24/7 use of the Cool Cap® will shorten the product's useful life when used in harsh environments. In such cases, expect to replace your unit on an annual basis.

***Please recommend the Cool Cap® to your family and friends.
And remember...A Cool Cap® makes one of the coolest gifts ever!***

Our Product Line:

Cockpit Cover

- A form fitting cockpit cover for small Sports Cars like the Corvette, Porsche Boxster, Mercedes SLK 230, Pontiac Solstice, and BMW Z4
